TECNOLOGIE UTILIZZATE

mongoDB®

IL DATASET

- Open Food Facts
- 540'000 prodotti da tutto il mondo
- Informazioni sui prodotti, tabella nutrizionale, ingredienti, nutrienti, allergeni, ecc..

PULIZIA DEL DATASET

- Filtraggio del dataset con prodotti venduti in Italia
 - Circa 161,000 prodotti
- Il dataset iniziale aveva campi contenenti double quote

SERVER - 1

The screenshot displays the Studio 3T application interface. On the left, a sidebar shows a tree view of the database structure: 'MY_FOOD 18.207.188.216:27017' is expanded, showing a 'Food' database with 'Collections (1)' (containing 'ItalianFood'), 'GridFS Buckets (0)', and 'System (0)', and a 'local' database. The main panel is titled 'Recent Connections' and shows a connection to 'MY_FOOD (18.207.188.216:27017)' with a '+ Connect...' button. Below this, a 'What's new' section with 'Older' and 'Newer' links announces 'SQL Joins support now available in Studio 3T'. It includes a link to the 'Knowledge Base' for new users and explains that SQL queries can now use Inner and Left Outer joins. A code editor snippet shows an SQL query: '1 SELECT Orders._id, Customers.name', '2 FROM Orders', and '3 INNER JOIN Customers ON Orders.customerID = Customers._id'. The announcement concludes by stating that this allows joining data from different collections and provides links for MSI installers and further news.

What's new

[Older](#) [Newer](#)

SQL Joins support now available in Studio 3T

New to Studio 3T? Head over to our [Knowledge Base](#) and get up to speed.

Using [SQL Query](#), data can now be joined via a:

- Inner Join
- Left Outer Join

```
alice Studio 3T ReplicaSet (alice) [replica set] demo-shop
3T SQL Tutorial
1 SELECT Orders._id, Customers.name
2 FROM Orders
3 INNER JOIN Customers ON Orders.customerID = Customers._id
```

This means you can now join data from different collections and see a comprehensive comparison of the two.

We've also included- an MSI installer for Enterprise Edition users, the ability to save/load export settings, and other improvements to this release.
